Fixture page 1

Line 1 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 2 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 3 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 4 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 5 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 6 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 7 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 8 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 9 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 10 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 11 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 12 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 13 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 14 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 15 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 16 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 17 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Line 18 of page 1: ERK waves travel across the sheet while the cells drift toward the source.

Fixture page 2

Line 1 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 2 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 3 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 4 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 5 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 6 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 7 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 8 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 9 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 10 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 11 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 12 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 13 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 14 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 15 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 16 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 17 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Line 18 of page 2: ERK waves travel across the sheet while the cells drift toward the source.

Fixture page 3

Line 1 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 2 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 3 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 4 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 5 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 6 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 7 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 8 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 9 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 10 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 11 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 12 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 13 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 14 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 15 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 16 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 17 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Line 18 of page 3: ERK waves travel across the sheet while the cells drift toward the source.

Fixture page 4

Line 1 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 2 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 3 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 4 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 5 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 6 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 7 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 8 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 9 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 10 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 11 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 12 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 13 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 14 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 15 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 16 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 17 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Line 18 of page 4: ERK waves travel across the sheet while the cells drift toward the source.

Fixture page 5

Line 1 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 2 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 3 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 4 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 5 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 6 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 7 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 8 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 9 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 10 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 11 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 12 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 13 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 14 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 15 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 16 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 17 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Line 18 of page 5: ERK waves travel across the sheet while the cells drift toward the source.

Fixture page 6

Line 1 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 2 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 3 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 4 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 5 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 6 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 7 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 8 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 9 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 10 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 11 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 12 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 13 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 14 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 15 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 16 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 17 of page 6: ERK waves travel across the sheet while the cells drift toward the source.

Line 18 of page 6: ERK waves travel across the sheet while the cells drift toward the source.
