bead stiffness density coating confocal fluorescent force cellular modulus gradient spheroid fluorescent bioprinting porosity elastic fluorescent granule polymer viscoelastic displacement adhesion bioprinting cellular microscopy collagen tissue collagen collagen granule granule polymer polymer cellular cellular field fibroblast migration porosity polymer adhesion migration bioprinting stress coating gradient viscoelastic cellular substrate bead microscopy matrix stress granule matrix microscopy stress stiffness stress spheroid fibroblast adhesion spheroid spheroid adhesion force bead coating stiffness scaffold coating diffusion viscoelastic gradient bioprinting granule tissue traction adhesion migration modulus fluorescent confocal stiffness crosslink stiffness density bead confocal elastic gradient field traction strain hydrogel polymer matrix crosslink gradient substrate matrix displacement porosity hydrogel stress fibroblast stress adhesion hydrogel substrate stress spheroid cellular force hydrogel porosity scaffold traction fluorescent stiffness bead confocal viscoelastic substrate force traction rheology matrix polymer collagen collagen viscoelastic elastic cellular strain gradient substrate force viscoelastic field substrate confocal cellular density confocal rheology fibroblast spheroid displacement field spheroid scaffold substrate modulus bioprinting porosity adhesion rheology matrix adhesion hydrogel rheology displacement crosslink diffusion crosslink gradient microscopy stiffness traction stress gradient diffusion displacement rheology bead field matrix adhesion granule spheroid diffusion bead fibroblast displacement confocal field crosslink stiffness stiffness displacement stiffness viscoelastic stiffness adhesion tissue gradient matrix density substrate density cellular migration gradient spheroid field hydrogel viscoelastic cellular density viscoelastic stress diffusion displacement coating migration cellular tissue adhesion network adhesion traction spheroid network cellular force collagen modulus fibroblast adhesion spheroid migration diffusion traction viscoelastic confocal stiffness bioprinting microscopy polymer fluorescent gradient granule stiffness scaffold viscoelastic modulus diffusion gradient traction diffusion stress elastic field porosity crosslink matrix field stiffness collagen viscoelastic viscoelastic porosity gradient confocal substrate cellular bioprinting spheroid migration collagen hydrogel stiffness granule bioprinting elastic fibroblast porosity substrate fibroblast bioprinting strain strain network rheology field spheroid bioprinting bioprinting cellular bead stress rheology bead viscoelastic coating fibroblast stress rheology field substrate spheroid coating modulus tissue fluorescent field traction collagen scaffold granule spheroid porosity diffusion displacement fluorescent spheroid traction fluorescent rheology displacement substrate field field rheology spheroid density modulus coating collagen stress field porosity matrix field density coating confocal stiffness gradient collagen traction granule bead diffusion confocal elastic porosity migration granule strain strain spheroid bioprinting spheroid scaffold migration field confocal microscopy stress granule strain field spheroid stress substrate cellular spheroid diffusion rheology matrix porosity substrate strain porosity force microscopy network displacement hydrogel microscopy coating matrix strain microscopy scaffold rheology force modulus modulus network modulus collagen field tissue substrate adhesion adhesion viscoelastic cellular microscopy polymer traction diffusion elastic bioprinting microscopy displacement force modulus scaffold collagen granule strain hydrogel fibroblast rheology rheology stiffness gradient force collagen field substrate crosslink field diffusion diffusion network bead microscopy diffusion fluorescent bead field density collagen fluorescent gradient confocal bioprinting adhesion collagen coating matrix hydrogel traction hydrogel modulus crosslink confocal fluorescent bioprinting confocal spheroid fibroblast elastic density coating porosity bioprinting force substrate strain network modulus hydrogel rheology polymer collagen bioprinting stiffness fluorescent field matrix stiffness bioprinting bioprinting collagen stiffness field strain gradient density traction polymer adhesion scaffold microscopy elastic traction traction adhesion migration migration traction rheology spheroid stiffness granule strain spheroid stress strain fibroblast confocal confocal elastic migration substrate cellular microscopy gradient bioprinting spheroid substrate diffusion bead

1 displacement cellular field fluorescent traction spheroid traction stiffness gradient fibroblast
2 force coating confocal spheroid substrate modulus fibroblast field confocal fluorescent
3 cellular traction migration coating network hydrogel scaffold gradient stress adhesion
